Project Proposal

CLASS ID: 108986

A* Algorithm Simulation Using
Graph And City Map

Project Title: A* Algorithm Simulation Using Graph And City Map

Language: C#

Fareamework Using: .net Windows Form

Project Members:

Student ID	Student Name
8929	Syeda Marium Khalid
11508	Muzamil Khan

Project Discription:

In this project we will make simulation of A* algorithm using graph and takje city map for heuristc values and user can input the node from which he can start his journey and graph will simulate automaitically along with path highlights in city map.
